Virtual Classroom software for remote learning

Try our Integrated SMS a simple, easy, powerful remote learning & assessment Platform.

Integrated SMS is an Online teaching software which provides a simple digital platform linking Teachers and students for effective learning. Teachers can easily conduct live online classes or upload videos and assess students. Instant Quizzes can be conducted by selecting questions from an exhaustive question bank. A very good simulation of subjective type questions where students can write answers, take photo of answers for submission. Teachers can easily correct the answers submitted by students and write their comments on it. This gives an exact replica of offline assessments. Overall, Integrated SMS is very comprehensive and easy to use online remote learning & assessment platform.

Live Classes

Integrated SMS enables you to conduct online live classes. We have integrated Zoom, Google Meet and MS Teams so that you can use any of these video conferencing service providers for online classes.

Conceptual Learning & Self Assessment

Integrated SMS provides contents for Maths, Science & English matching the CBSE/ ICSE curriculum. Contents are provided Subject wise, chapter wise, topic wise with respective assessment or quizzes for students to get well acquainted with the concept. This gives an in-depth understanding of the topics so that students get conceptual clarity. Students can use this as a self-learning & assessment tool for intense practice.

Best asset to bring powerful learning to every classroom even during testing times

Empowering every kid in their quest for knowledge.

Question Bank

Our Question bank is stored in hierarchical manner of board, class, subject, chapter, and topics. You can create your own question bank by adding questions manually. We have also provided an easy to import facility with a predefined Word format. Based on set parameters, we will be able to quickly generate a question paper for both offline and online scenarios

Online Exams, Test analysis & reports

Students can be assigned with online exams which enables to the students to take the test in a time bound manner with ease of flow from start to end. On submission of the answers, we can have instantaneous scores for all the objective type tests. Students can see in-depth test analysis to identify their strong and weak areas. The report provides complete analysis on subject/chapter/difficulty level/time taken for questions.

Try our Integrated SMS a simple, easy, powerful remote learning & assessment Platform.

Easy Connect to School

- Modern schools have understood the need for communication and connect with the parents and students regularly via high tech communication tools.
- Cblaze introduces asynchronous communication tools to reach out to the parent right on their handheld devices.
- The school mobile app promotes personalized communication to parents about various happenings in the school.
- The mobile app for schools is mutually beneficial for the parents, students, teachers and the school authorities.
- It is easy to use and requires no training. Groups can be created to deliver messages.
